

FUEL CELL
SYSTEMS

Fuel cell systems for distributed power generation markets

Convion will provide SOFC solutions for distributed power generation markets, by commercializing 50–300kW products during the coming years.

Convion products will be driven by:

- **Energy Efficiency:** Premium energy efficiency
- **Low emissions:** Close to zero NO_x, SO_x, HC and PM emissions
- **Fuel flexibility:** City gas, natural gas and bio gas operation
- **Power security:** Reliable, grid-independent power generation
- **Economy:** Power generation with competitive LCC

Convion Ltd. is among the leading SOFC system developers. In January 2013 Convion took over Wärtsilä fuel cell program with over 250 man years of experience in SOFC system development.

The program has accumulated more than 14 000 cumulative hours of operating experience of 20 and 50 kW SOFC systems on natural gas, biogas and methanol.
